

DeTectUs – Stopping Heart Failure In Its Tracks

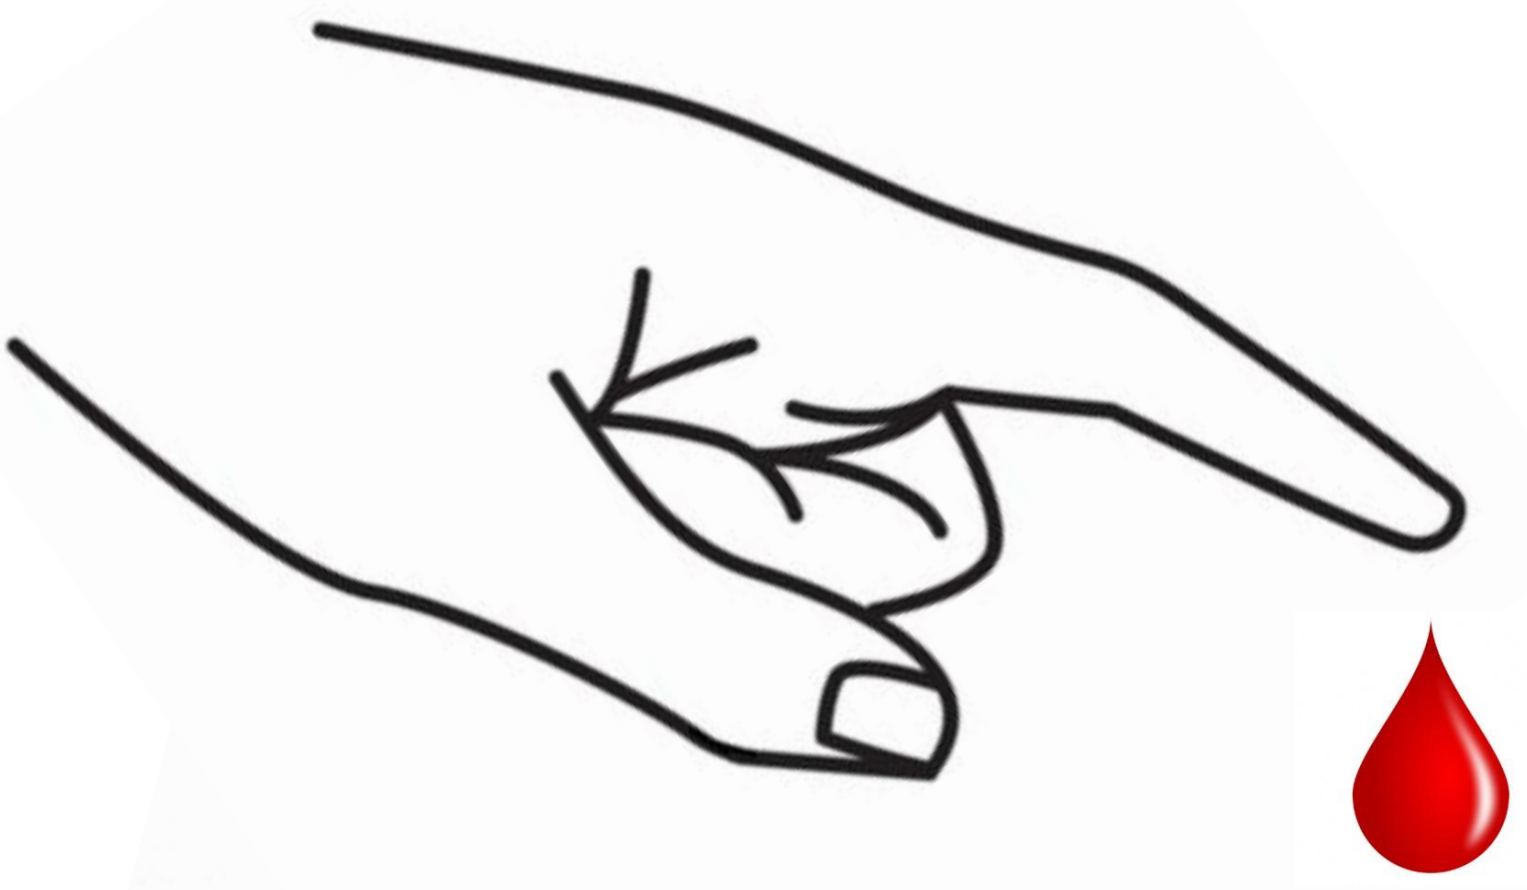

- Cardiovascular diseases are the #1 cause of death in Europe
- There were 11.3 million new cases in Europe in 2015
- 1 in 10 people in Europe suffer from cardiovascular diseases

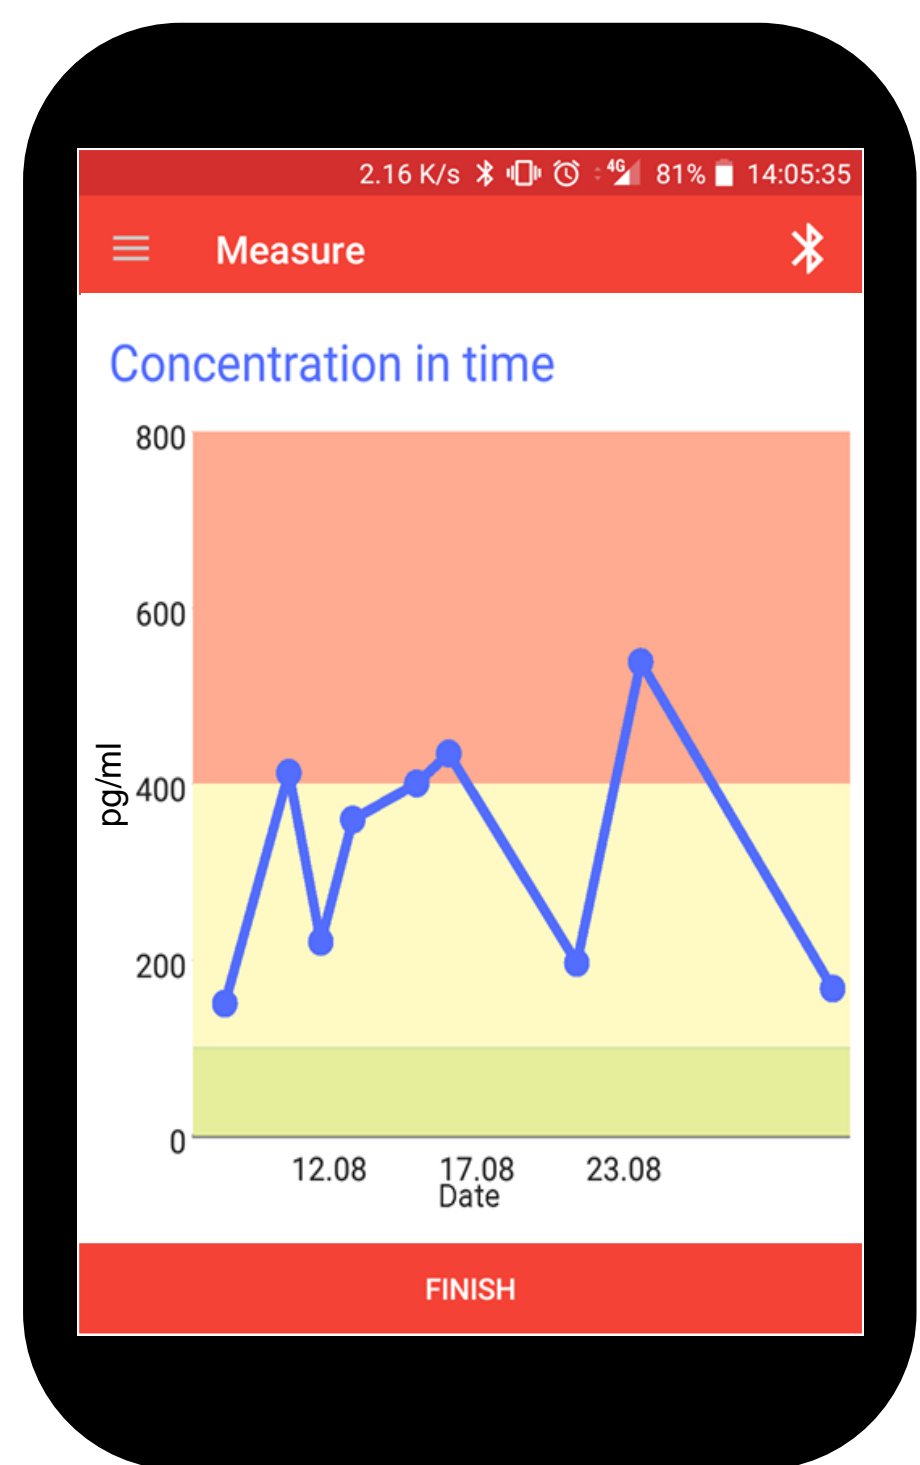

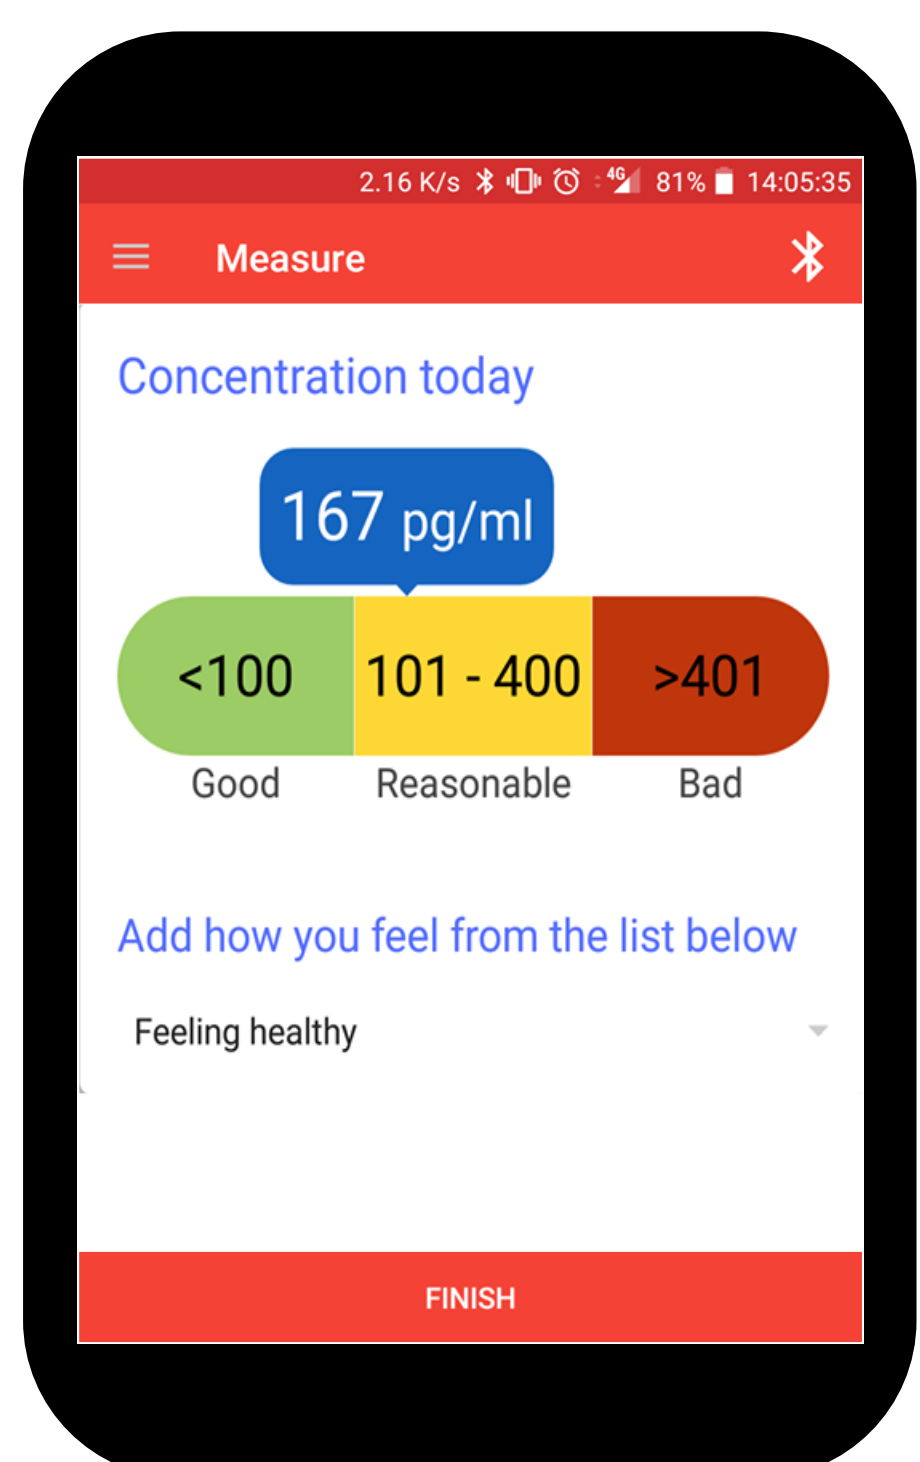

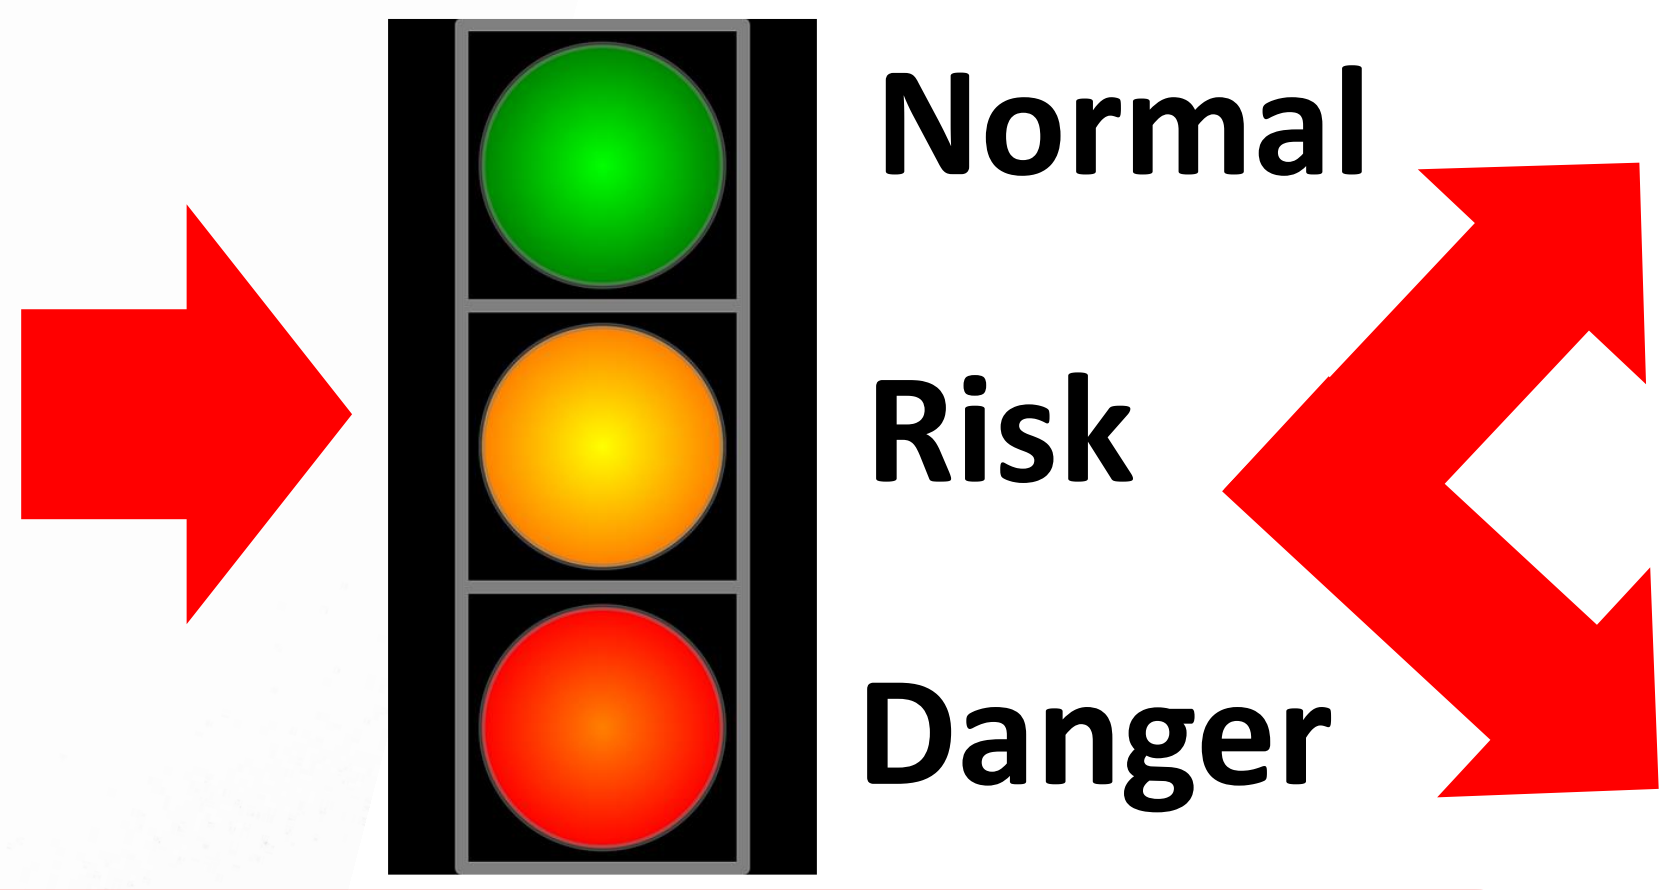

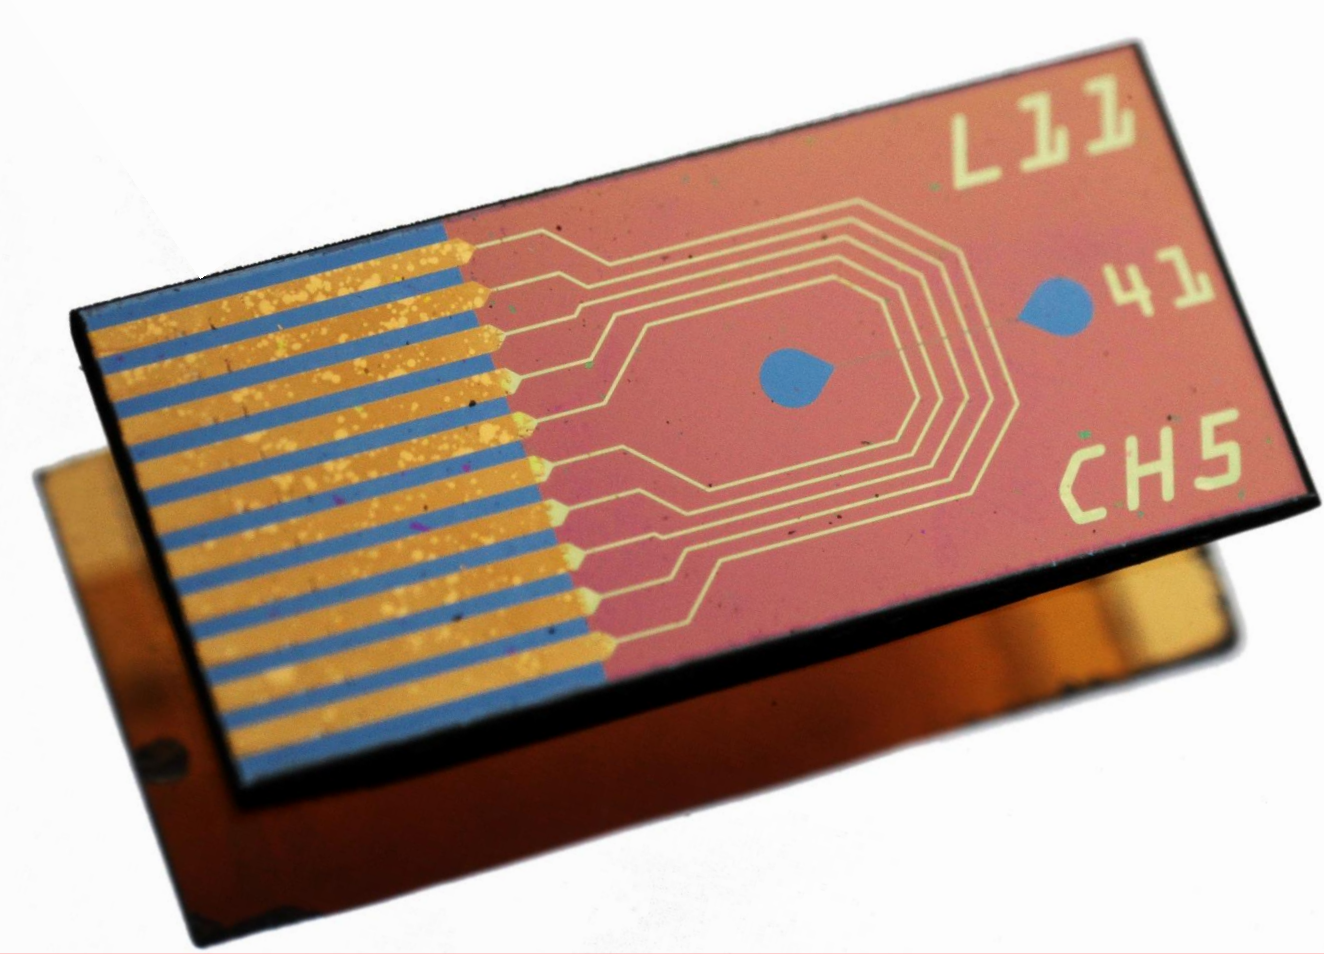

- It costs the EU economy estimatedly 210 billion € per year [ehnheart.org]

**Tracking NT-proBNP can save lives...
...All it takes is a drop of blood - just like diabetes!**

No need to wait. Get the results immediately on your smartphone!

How it works:

- NT-proBNP levels raised when the heart is under stress
- Continous monitoring of patients in risk zone can foresee heart attacks
- Silicon nanowire biosensors are the fastest and most sensitive instrument yet
